Hotel NH Constanza

Barcelona  
2015  
October 1 - 3

## PROGRAMME

President IPA:  
Dr. Domenico Baldi  
Chairman:  
Dr. Javier González Lagunas

## WELCOME

Since its creation, the International Piezosurgery Academy has maintained a clear objective in its mind: become the international model for all those involved in the use of piezoelectric medical and dental devices. National meetings are designed to present the latest advances in new techniques of bone surgery and clinical protocols, and with the celebration of international symposiums a real interest in the worldwide promotion of bone piezoelectric has been established.

In this 3rd international symposium of the IPA we are all rowing in the same direction. We want to offer the delegates an amazing scientific program with the best speakers worldwide and cover all aspects of piezoelectric bone surgery. Our motto "Connecting the dots: preservation-augmentation-esthetic excellence" will be the thread that runs through the entire program.

Now it is the turn of Barcelona to organize the third international symposium. We are working hard to achieve excellence and go beyond your expectations, not only in the scientific program, but also in our social events. Barcelona is one of the world's most popular destinations for professional meetings: its facilities, the high standard of hotels and restaurants, together with the warmth of its citizens have converted the city into a magnet for professional travellers.

So mark your calendar and make your plans well in advance. Barcelona will not disappoint you. In the next few months we will keep you informed about the symposium. But don't forget that the success of the meeting requires not only our work and effort, but also your participation and support.

See you in Barcelona

Dr Domenico Baldi  
President of the International  
Piezosurgery Academy
