Dear colleagues,

We would like to invite you to the first hands on course on craniofacial malformations, held in Innsbruck.

The focus will be on step by step learning and exercise on the main procedures for the correction of the craniofacial synostosis (frontoorbital osteotomies, remodeling, advancement and fixation with up to date technologies such as piezosurgery and SonicWeld® system).

The aim of this course is to give a theoretic introduction and practice the surgical management of craniofacial synostosis. There will be plenty of possibilities to share opinions and discuss with the tutors. Also, you will experience the atmosphere of Innsbruck
